**Re: JSW Steel USA Ohio Inc. – LEED Average Recycled Content
Melted & Manufactured Carbon Steel Products**

To Whom it May Concern:

JSW Steel USA Ohio, Inc. utilizes recycled materials in the form of scrap as its majority feedstock to its Consteel™ Electric Arc Furnace (EAF) steelmaking process. **The average recycled scrap content is approximately 78% of the total relevant inputs to the steelmaking process.** The recycled content can contain but is not limited to one or more of the following raw material types:

- #1 Bundles
- #1 Heavy Melt
- Beach Iron
- Busheling
- Cast Rolls
- Flashing
- Furnace Iron
- Internal Scrap
- P & S
- Railroad Rail and track material
- Shred
- Tin Busheling
- Turnings
